## ABOUT THE INSTITUTE

The Institute is accredited Institute of Information Technology and Management (IITM) was set up in 1999 under the aegis of Mata Leelawati Shikshan Sansthan (MLSS), a registered education society engaged in various philanthropic activities, with Shri T.N. Chaturvedi - The well-known Educationist, Parliamentarian, Ex-Governor of Karnataka, CAG of India and Padma Vibhushan Awardee as Founder President of both the society and the institute.

The Institute is an ISO 9001:2008, ISO 10002:2014 certified institute, approved by All India Council for Technical Education (AICTE), Ministry of HRD, Government of India and Recognised U/s 2(f) of UGC Act. The institute is accredited 'A Grade' by NAAC and NBA (MCA Programme). The institute is a dynamic member of AIMA, CSI, DELNET, PHD-Chamber, and ISTE .The Institute is affiliated to Guru Gobind Singh Indraprastha (GGSIIP) University, Delhi for MCA, MBA, BCA, BBA and B. Com, (H) programmes.

The Institute takes pride in having developed the faculty support and infrastructure imperative to effectively implement 'Outcome Based Education'- a technology-based, learner centric and result-oriented approach which enhances students' learning and performance capabilities. IITM conducts a plethora of short duration skill enhancement and syllabus enrichment workshops related to areas of management specializations and emerging technologies. Students undergo classroom lectures, tutorials, case studies, assignments, seminars, workshops, multimedia presentations, and expert lectures by eminent persons from the industry and academia. It has a strong alumni network of over 3000 professionals working at various management levels in the leading corporate houses of the country.

For more than two decades, the institute has offered relevant and rewarding technical and business education to the students. Today the institute continues to attract a diversity of smart and talented students to its range of academic programmes including MBA, BBA, BCA and B. Com (H). The Institute is passionate about grooming young students to be leaders, who are to become both excellent professionals and good human beings by adopting "Student Centric Approach". In fact, IITM is the institution of choice for many seeking a rigours technical or business education and much more.

## VISION

"The Institute aims to be a Centre of Excellence, promoting value-based quality education in the contemporary areas of advanced professional studies in Information Technology and Management."

## MISSION

The Institute endeavors to

- Promote learning environment that delivers employable students with strong analytical mind, thinking ability, entrepreneurial and organizational skills required in a dynamic professional environment,
- Foster strategic alliance with industry for applied research, and
- Inculcate ethical, social and moral values amongst students.

## FROM CHAIRMAN'S DESK

*Albert Einstein stated once "Education is not the learning of facts, but the training of the mind to think."* At IITM the purpose of education is not

simply to accumulate a set of facts, but rather to develop the ability to think critically and creatively among students. Our focus is on developing skills such as problem-solving, analysis, and communication, which can be applied to a wide

range of situations and contexts. By training the students to think, we instill in them to become adaptable, resilient, and capable of navigating complex challenges and opportunities. This kind of education is not limited to a specific subject or field, but applicable to all areas of life, from personal relationships to professional pursuits. We also nurture excellence in academics, skill, curricular, and extra curriculum areas. With this we chisel the personality as the craftsman does with his art works.

The college magazine, "PRAGYA," plays a crucial role in showcasing what our institution has to offer. It features contributions from students, faculty, and staff that reflect the institution's values and aspirations, revealing previously unknown aspects of the institution. I extend my congratulations to all the stakeholders, including our faculty, staff, students, and parents, for their commitment, dedication, and responsibility, which have transformed our institution into a remarkable and meaningful center of education.

I would like to express my greetings to the editorial board of IITM for producing an exceptional magazine that excels in all aspects. I want to acknowledge the hard work of the editorial team who has done a remarkable job compiling the creative works of the students and faculties and the activities of IITM for the previous academic year.

## **FROM EXECUTIVE DIRECTOR'S DESK**

The achievement of students is enhanced when they are studying topics that are relevant to them. Student-centered learning prioritizes the interests of students and allows them to have control over their education in two key ways: choosing the subject matter they study and determining the methods they use to learn it. This approach to teaching recognizes the importance of students' opinions and involvement in their own learning process. It emphasizes the need for students to be active and accountable participants

in their education. At IITM we wholeheartedly embrace this pedagogical doctrine, instruction and learning and make sure that this should be finely tailored to the maximum feasible extent, providing students a meticulously calibrated educational experience.

The college's esteemed publication, "PRAGYA" plays an indispensable role in advancing the institution's offerings. It provides an exclusive avenue for the articulation of the students', faculties, and other team members' distinctive ethos and aspirations, unraveling hitherto uncharted territories. In addition, I take this opportunity to express my admiration for the unwavering commitment, dedicated service, and sense of accountability demonstrated by our faculty, staff and students all of whom have played a pivotal role in elevating our institution to a preeminent and notable citadel of learning.

## FROM DIRECTOR'S DESK

Design thinking represents a powerful methodology that fosters the generation of novel, groundbreaking insights into complex human problems, which in turn fuels the creation of innovative solutions that are tailored to address those problems. This approach diverges from the traditional scientific approach in that it prioritizes an iterative, synthesis-based approach over a linear, problem-driven one. Instead of being confined to a rigid problem statement, design thinkers take a holistic view of the issue at hand, and strive to

formulate a flexible goal that can act as a beacon for continued innovation. This is especially important when dealing with "wicked problems," which are characterized by multiple, often interconnected causes and effects that can be approached from a variety of angles.

We at IITM nurture design thinking and social transformation. IITM is a place where we impart technical education, nurture competency and ensure "NO ONE IS LEFT BEHIND". Our institution's ultimate goal is to facilitate academic excellence, character development, and personality growth. Our well-designed academic and co-curricular program serves as a stepping stone for the students to unlock their full potential and develop sound work habits. We strive to provide a nurturing environment that fosters creativity, innovation, and critical thinking skills, which will prove to be instrumental in preparing our students for the challenges of the future.

The annual college magazine, "PRAGYA," stands as a magnificent embodiment of the creative process of our students, staff, and teachers. I extend my heartfelt congratulations to the entire team whose relentless hard work and unwavering dedication culminated in the realization of this magazine. The positive attitude, sustained efforts, and innovative ideas that our young students have exhibited through this magazine are bound to capture the imagination of the readers, leading them on a journey of unbridled joy and pleasure.

## FROM EDITORIAL TEAM

Esteemed Readers,

We are elated to present to you the 21st edition of our esteemed annual student magazine, PRAGAYA (2022-23). It is with utmost delight that we unveil this publication, which encapsulates the noteworthy events of the bygone year. Moreover, our magazine serves as a platform to showcase the remarkable talents possessed by our esteemed students. With the collective efforts and contributions of our diligent students, we sincerely hope that the forthcoming pages will offer an enthralling reading experience.

This particular issue holds a special allure as it exemplifies the creative prowess of our students at IITM, thereby enabling a reconnection with the innate ingenuity that we all possess. We have painstakingly strived to present an exhilarating flashback, shedding light on the college's inception, as well as the myriad events and accomplishments throughout the academic year 2022-2023. Within these pages, you will find captivating articles, heartfelt poetry, intriguing anecdotes, awe-inspiring artworks, and a plethora of other enthralling features. This magazine provides an excellent platform for aspiring writers and poets, fostering a literary taste among our cherished students.

We extend our heartfelt gratitude to all the talented authors whose contributions have graced our publication with a rich assortment of spectacular articles encompassing a wide array of exciting topics. Furthermore, we take immense pride in acknowledging the unwavering commitment and exceptional dedication exhibited by our management and staff in all college activities and endeavors towards continuous improvement.

The editorial team eagerly anticipates making this magazine a conduit for our students to express their innermost thoughts and sentiments. We sincerely hope that you derive as much pleasure from reading this issue as we have experienced in its creation.

We genuinely appreciate and encourage any suggestions or constructive feedback pertaining to our magazine

Yours sincerely,

EDITORS Team

# *Population Dynamics in G20 Nations: Navigating Growth as a Catalyst or Challenge for Development*

Population growth has been a subject of extensive debate, with perspectives varying between considering it a catalyst for development and viewing it as a hindrance to progress. As human beings, our journey from African origins to global colonization is awe-inspiring. The growing population, particularly in G20 nations, presents both challenges and opportunities for development. In this article, we delve into the potential benefits that can arise from effectively managing population growth, and why it should be seen as a driver of progress.

## **Harnessing the Power of Population Growth**

Did you know that by 2050, the population of G20 nations is projected to reach 4.8 billion people, reflecting an increase of over a billion in just three decades? This rapid growth might seem daunting, but it also presents a unique chance to leverage the burgeoning populations for development on unprecedented levels. Amidst global population growth, particularly in G20 countries, it's imperative to acknowledge that this demographic shift can be a catalyst for progress, rather than a roadblock.

## **Unlocking the Potential of Population Growth**

**1.Economic Growth and Productivity:** A surge in population can have a positive impact on the economy. For instance, in the United States, a larger workforce translates to increased productivity. The availability of more labor enables businesses to expand their operations, boosting output and leading to a higher GDP. This, in turn, spurs job creation, lowers unemployment rates, and stimulates economic growth.

**2.Diversity and Innovation:** A diverse population fuels creativity and innovation. By bringing together individuals from different backgrounds, cultures, and experiences, new perspectives and ideas emerge. The fusion of music styles in the United States and the diversity-driven strategies of tech giants like Google, Apple, and Microsoft underscore the role of diversity in innovation.

**3.Investing in Human Capital:** A growing population necessitates investment in human capital development. Countries like Canada prioritize education and healthcare, yielding a skilled workforce and an improved standard of living. Robust educational systems and accessible healthcare contribute to healthier and more productive populations.

**4.Entrepreneurship and Consumer Demand:** A larger population signifies a larger pool of potential entrepreneurs and innovators. The youth of India, for instance, have propelled the nation's thriving startup ecosystem, resulting in successful ventures like Flipkart and Zomato. China's vast consumer market has driven the growth of global leaders like Alibaba and Tencent.

## **Challenges and Mitigations**

**The unrestrained growth of past generations** is responsible for the current population explosion. Countries like India grapple with a blend of unawareness, limited family planning awareness, and economic constraints. Alarming figures paint a vivid picture—a staggering 3,85,000 newborns estimated by the UN on a daily basis.

**Agricultural booms** intensify the challenge, as more than half the population toils in this sector, often requiring additional hands. However, this unprecedented surge comes at a cost—dwindling living standards and escalating costs of living. The upswing in demands for essentials like food, water, and energy strains resources, thrusting us towards environmental degradation and resource depletion. The labyrinth of resource allocation remains intricate, leaving portions of society deprived due to poor governance. This, in turn, breeds widespread poverty, resulting in economic instability and a gaping wealth divide.

Contrary to the notion that growing populations equate to progress, the stark reality paints a different picture. **The specter of unemployment** has kindled a survivalist mindset, pushing individuals into menial jobs for sustenance. Unfortunately, job creation struggles to keep pace with population growth, setting the stage for heightened crime rates as people seek illicit means of survival.

As populations surge, **urbanization takes flight**, placing an immense burden on housing, power, water, and transportation. Managing these needs with limited resources is a Herculean task, coupled with the sobering reality of environmental degradation through pollution and climate volatility. Notably, G20 nations such as the US and China shoulder a significant share of greenhouse gas emissions. Continuing on this trajectory could deepen the strain on our environment.

Thus, rather than seeing population growth as an automatic catalyst for development, we're confronted with an imperative for immediate government intervention. The call for policies endorsing sustainable population growth rings loud. The intricate tapestry of population growth is no mere theoretical debate—it requires swift, tangible action. Failure to respond proactively could unleash an unprecedented cascade of challenges that we are unprepared to face.

So, in this evolving discourse, let's not just debate but also act with urgency. For in the hands of effective policies and collective responsibility, population growth could indeed lead us into an era of remarkable development—one that's not just prosperous, but also sustainable and equitable.

**-MUSKAN PANJWANI & SIMRAN KHURANA, BBA, SEM IV, M1**

## *Public Speaking Recipe*

Public Speaking is an art. Each of us want to speak professionally and in a way everyone listens to us and enjoy it.

Now I am going to tell you a three-step formula through which you can master this skill: -

1. The first and the foremost step is our ideas which play a vital role in public speaking. We should be connected to the current affairs, political news, etc so that we can talk about any topic in front of anyone.

2. The next step is our speaking manner which helps in attracting the listeners to listen to us. There are a few sub points to it.

a) We should keep a pleasant smile on our face while speaking.

b) We should speak in a polite manner. Our voice should be soothing.

c) We can take the help of voice modulations to make the listeners understand better.

d) We can use idioms and phrases to explain our idea in a better manner. For example: - If we are speaking about health, we can use the phrase health is wealth.

e) We should try and engage the listeners also by asking questions to them or by solving their doubts so that they don't get bored by just listening.

3. Now the last and most important step is confidence. I know you must be wondering that we all know confidence is the key but still we take it for granted and don't work on improving the confidence part, but it is the most important in each and each everything. A person holding the mic and speaking in a shaky voice will not look good even if his or her ideas are on point.

**Develop confidence in yourself, it comes from within not from outside.**

- **KHUSHI GUPTA, BBA, SEM II, M1**

## The Invincible Threads of Social Interaction

1. Don't call someone more than twice continuously. If they don't pick up your call, presume they have something important to attend to.
2. Return money that you have borrowed even before the person who has given the money, remembers or asks for it. It shows your integrity and character.
3. Never order the expensive dish on the menu when someone is giving you a lunch or dinner.
4. Always open the door for the person coming behind you. It doesn't matter if it is a guy or a girl, senior or junior. You don't grow small by treating someone well in public.
5. If you take a taxi with a friend and he or she pays now, try paying next time.
6. Respect different shades of opinions. Remember, what's 6 to you will appear 9 to someone facing you. Besides, a second opinion is good for an alternative.
7. Never interrupt people who are talking. Allow them to pour it out. As they say, hear them all and filter them all.
8. Say "thank you" when someone is helping you, even for smaller things.
9. Praise publicly. Criticize privately (there is always room for improvement).
10. Treat the cleaner with the same respect as the CEO. Nobody is impressed at how rudely you can treat someone below you, but people will notice if you treat them with respect.
11. If a person is speaking directly to you, staring at your phone is rude.
12. Never give advice until you're asked.
13. Remove your sunglasses if you are talking to anyone in the street. It is a sign of respect. Moreover, eye contact is as important as your speech.
14. If you can't appreciate someone, don't discourage them.
15. If you can't pick up the calls during any meeting or in any situation, always inform the respective caller via text message and try to call back later.

**Appreciation remains the easiest way to get what you don't have.  
It costs Rs. 0 to show gratitude and kindness.**

**- ARLEEN KAUR, BBA, SEM IV, M2**

# **Crypto-currency: A Financial Game-Changer**

## **Introduction:**

Cryptocurrency, led by Bitcoin, is reshaping finance in our rapidly changing digital landscape. This article delves into cryptocurrency's essence, its origins, advantages, impact on traditional finance, and its intriguing future.

## **The Birth of Cryptocurrency:**

Cryptocurrency emerged in 2008 with Satoshi Nakamoto's release of the whitepaper "Bitcoin: A Peer-to-Peer Electronic Cash System," setting the stage for a financial revolution.

## **Understanding Cryptocurrency:**

Cryptocurrency is digital money that operates without central authorities. It relies on secure blockchain technology, ensuring transparency and security.

## **The Allure of Cryptocurrency:**

Cryptos offer enticing benefits. They slash transaction costs and speed up cross-border payments by cutting out intermediaries. More importantly, they grant individuals control over their finances, offering financial inclusion to the unbanked.

## **Cryptocurrency's Impact on Finance:**

Some see crypto as a force for good in finance, enabling inclusivity and reducing inequality. However, concerns about price volatility and regulatory challenges linger. Striking a balance between innovation and security is paramount.

## **The Mysterious Future:**

Cryptos are gaining traction, attracting interest from financial giants and tech titans. Blockchain's transformative potential is explored for process optimization and enhanced security. Central bank digital currencies (CBDCs) bridge the gap between traditional and digital finance, aiming for stability and innovation.

## **Conclusion:**

Cryptocurrency is redefining finance with its promise of low-cost, rapid transactions, and financial accessibility. But as we embark on this journey, cautious optimism and sensible regulation are vital. The future of finance is unfolding before our eyes, full of potential and transformation, and it's an exciting ride worth watching closely.

## POETRY SECTION

### Unfolding Life

Life's chapters unfold, unwritten and free,  
No guarantee of "happily ever after" to be.  
But with each turn of the page, we can make amends,  
And craft our own story that never truly ends.

Step into your greatness with boldness and grace,  
And live a life worth writing, in this precious, fleeting space.  
For the pages keep turning, and the ink never dries,  
So seize every moment before your story dies.

-Manya Sharma, BBA, Sem IV, M1

मनरेख संचारित

“की ए. आई क्या मदद कर रहा है? “

ए. आई एक आधुनिक यंत्र है,  
जिसने फांसे हम सबके मन के मंत्र है !  
कुछ अलग करने कि सोच को रोक ,  
अब लाया यह अपने तंत्र है !

रोक रहा यह हम सबकी क्षमता ,  
काट रहा लोगों के हाथ !  
अपनी पट्टी सबको पढ़ा कर ,  
यह कह रहा हम करें आराम !

इससे जंग लग रहा नई सोच को ,  
जाने रोक रहा यह कितने प्रयास !  
यह काल काल का है साथी ,  
जो बिगाड़ रहा हम सब का काल !

क्या हम काम को आसान बनाने में इतना खो रहें है !  
कि दिन प्रतिदिन इसके आदि हो रहे है!

अब वक्त है थमने लगा ,  
यह रोक रहा हमे आगे बढ़ने से !

कुछ हो ही नहीं रहा अलग सा ,  
वापस से फिर वही आ रहा !

रचनात्मक क्रिया घट रही है ,  
यह बस अपनी चला रहा है !  
कुछ नया करने से पहले यह,  
अपने विचारों से कर वार रहा है !

बस मदद मदद के नाम पर ,  
यह बना अपना आदि रहा है !  
क्या सच में लगता है आपको ,  
की ए आई कर मादा रहा है ?

-Jay Khandelwal, BCA, Sem IV, M1

## **"RAIN'S CATHARSIS" ~ RS**

As the raindrops tap against my skin,  
I feel them wash away my sins.  
The tears of the clouds blend with my own,  
As if nature shares in my moan.  
The rhythm of the rain plays a song,  
A melancholic melody that's never wrong.  
It echoes the depths of my soul,  
And reminds me that I'm not alone.  
  
For just as the rain brings life anew,  
It cleanses my heart and makes it true.  
And though it may be a fleeting pain,  
The rain helps me heal and start again.

-RAHUL SAHANI, BCA, SEM IV, M1

# Motivational Quotes

Your craving is just a distraction

Your needs should be paid attention

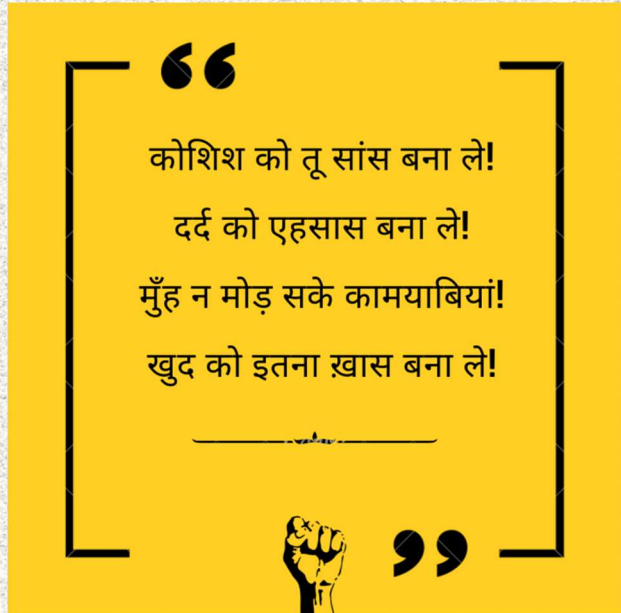

Make your dreams as your motivation

Put your all efforts with full dedication

Making your ultimate goal as only ambition

The achievement enjoyed will be true satisfaction

**-SAHIL BATRA, MBA, SEM II**

**ABHISHEK SINGH, BCA, SEM IV, M2**

उगते सूरज और दौड़ते हुए घोड़े के चित्र लगाने से प्रगति नहीं होती ।

प्रगति के लिए सूर्योदय से लेकर शाम तक घोड़े की भांति दौड़ना पड़ता है ॥

**- VANSHIKA MAHAJAN, BBA, SEM II, E2**

Books are the best,

Read them without any rest.

Fact, Fiction Anything you want,

Just Read them and flaunt.

# ALUMNI SPEAKS

**Ms. Snigdha Maggo**  
**MBA (2015-17)**

IITM is committed to impart the highest quality of education and exposure to help develop the next generation of business leaders with global outlook and capability of adapting to the fast changing business environment of India and the world at large. By introducing new specialization areas and adopting an innovative pedagogy, the Institute has been constantly working to develop professionals with vision, courage and dedication to initiate and manage the change.

The best part about this college was our faculties. They were very understanding, supportive and humble. We were also provided with a very exciting subject called general proficiency where we were made to stand in front of the class to share our views on various topics. This practice and the regular presentation activities really made a difference in my growth and at the end of the course I was more confident. Another great thing about IITM is the placement cell so we were given the opportunity to give interviews in plenty of top IT companies. Fortunately, I got placed in one of the organization through campus placements. I have worked there for almost 5.8 years. I am proud and grateful to be the part of IITM.

**Raghav Grover**

**Cloud Support Engineer- Linux, Amazon Web Services**

**Mr. Prabudh Gogia**  
**BBA(G) (2018-21)**

It gives me an immense pleasure to talk about my 3 years of journey at IITM. As it has been the turning point in my life because before coming to the college I was an introvert person who had stage fear and lacked confidence. But the opportunities that I have received here and the exposure that I got has truly transformed me into the person that I always wanted to be. Such experience of organizing management fest was a wonderful experience and the things that I had learned there will always go to help me in my future time. All the faculty members here are so supportive be it class mentor or program coordinator or program director. I would like to thank IITM for making me the person who I am today. I want to wish all the best to the upcoming batches of IITM and students already studying there. I want to conclude by saying “HONSLA RAKHNA TUM BULAND APNI MANZIL KO PAANE KE LIYE, CHIDIYA BHI GIRI THI PHELI BAAR AASMAN MEA JAANE KE LIYE”

From the first day at IITM in 2011 and until the last in 2017. IITM ensured that a great standard of education was given to each and every student. As a student they provided me with the perfect platform to not only gain education but also further opportunities to gain employment. The teachers did a wonderful job of becoming both a teacher as well as a friend to the students who are new to the college. They did not hesitate at all in spending time with students in and outside the classroom and college campuses wherever we had difficulty with class homework or to adapt to a new environment at work. In the end I would like to thank all of the faculty members of IITM for keeping faith in me, building up my confidence and being so supportive throughout my journey. They encourage me to do more and more and help me making dreams come into reality. So, all the very best to IITM for future.

**Himanshu Galhotra**  
**BCA (2011-14) & MCA (2014-17)**  
**Faculty, Deakin University and Freelancer for Deakin Freelancing hub Australia**

IITM helped me become a seasoned Sales and Marketing professional capable of keeping up with the requirements of the industry. The practical learning approach and the case study method used during my MBA programme helped me understand the dynamics involved in the management of any business.

**Nitin Chowdhary**  
**MBA (2015 - 17)**

**Bibhav Kirti Choudhary**  
**B.com(H) (2019-22)**

IITM has been a truly transformative journey for me. The outstanding faculty, state-of-the-art facilities, a vibrant campus culture and most importantly the placements provided me with an enriching and unforgettable college experience. The education I received here not only prepared me for my career but also instilled in me a lifelong passion for learning. I'm proud to be an alumni of IITM and grateful for the incredible memories and opportunities it has given me. I am immensely grateful to INTERNWARE- The internship cell for the support and growth opportunities I received, and I'm proud to have been a part of this exceptional team."
