

IITM/SP/PDP/13

Professional Development Programme for the Students

Higher education institutions play a significant role in the overall development of their most important stakeholders, the students, who then contribute to the nation's growth. This goal can be reached to a large extent by the scientific application of educational psychology, good classroom management, suitable evaluation techniques, the instillation of research aptitude, and, overall, methodical educational administration. To achieve this, the institute has developed a comprehensive policy for students.

The institute will take all necessary initiatives to encourage student development. Various schemes and initiatives will be officiated and inducted when a student is enrolled in the course.

Along with ethical and moral development, students will be encouraged to improve their academic and other talents.

- The Institute will encourage its students to achieve academic success through accredited MOOC courses on the Swayam/NEPTEL Portal, as mandated by the Indian government's education policy.
- Students will be able to select from over 2000 courses and enroll in any of them that interest them. With a repository of over 2000 courses and e-content produced by professors from the country's seven IITs, it would serve to bridge the gap between learning and teaching.
- The students will be aided in keeping up with the outside world. They are given with a language lab that includes Lanquill and Audacity software.

- The institute's PLACEMENT CELL helps students find the correct path. It is intended to hold regular counselling sessions for students so that they are appropriately orientated to their jobs and the options available to them. Apart from that, the placement cell conducts regular pre-placement activities.
- The Institute will make every effort to provide students with assistance and coaching so that they are prepared to take and pass competitive tests such as the MAT, CAT, GATE, and NET.
- The students are encouraged to participate/organize events such as conferences, seminars, symposiums, HR Conclaves, etc.,
- The institute shall encourage and make efforts to provide INTERNSHIPS to its students in both professional and non-professional degrees, which will expose them to the industry and familiarize them with work practices and professional ethics.
- The institute would also offer many SOFT SKILL ENHANCEMENT programs for its students, preparing them to face academic obstacles after completing their course.
